Create Approval Process Using Zoho Creator

Aim:

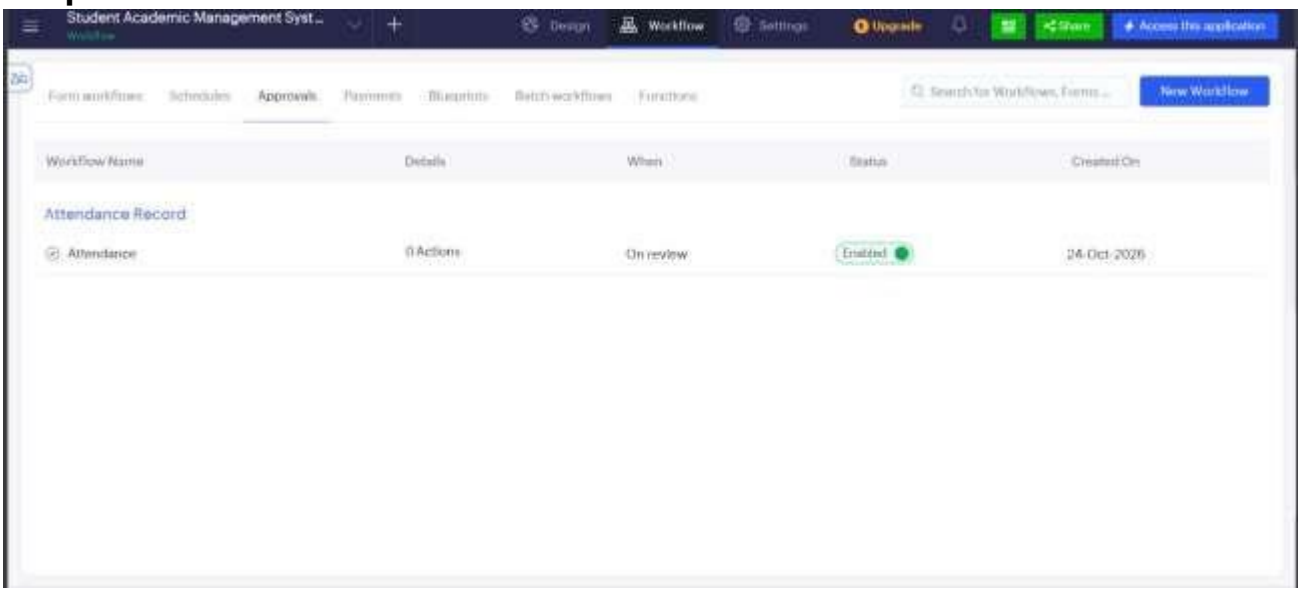

To create an approval process in the Student Academic Management System so that faculty can review and approve student assignment submissions or academic records.

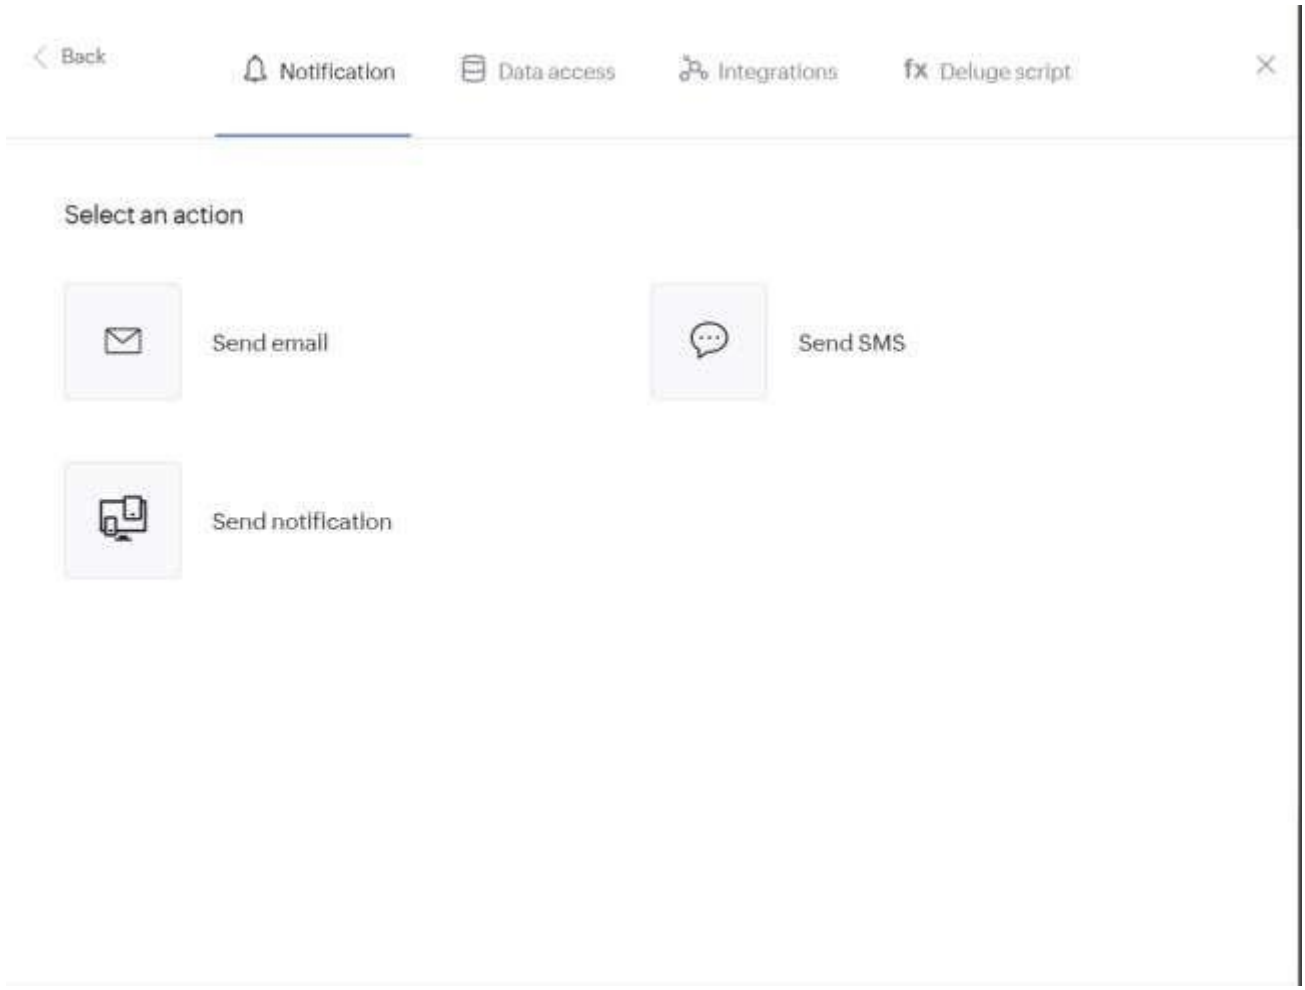

Procedure:

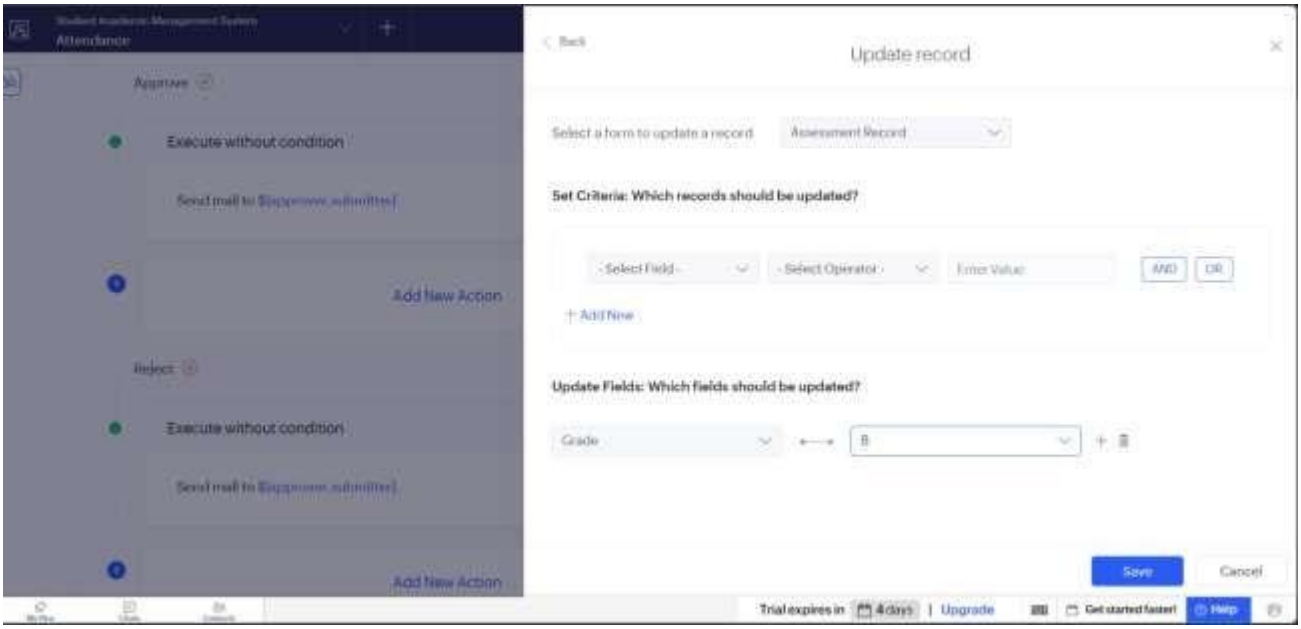

1. Log in to Zoho Creator and open the Student Academic Management System application.
2. Navigate to the Workflows section in the application builder.
3. Select Approvals or the approval-process option available in your Creator interface.
4. Click Create Approval Process.
5. Select the form for which approval is required, such as Assignment Details.
6. Set the approval criteria, such as requiring approval when a student submits an assignment.
7. Assign the approval task to the appropriate faculty member or administrator.
8. Configure the available actions for approved and rejected records.
9. Add notifications to inform the student about the approval decision, if supported.
10. Save and activate the approval process.
11. Test the process by submitting a sample assignment and verifying that the assigned approver can approve or reject it.

Result

The approval process was created successfully in Zoho Creator. Assignment submissions can be reviewed by the assigned faculty member, and the approval decision determines whether the record is approved or rejected. This helps maintain a structured review process in the Student Academic Management System.
